EDUCATION

Veer Narmad South Gujarat University

Software Development Bachelor of Computer Application

CGPA: 8.2

Surat, Gujarat

July 2022 - Apr 2025

EXPERIENCE

TriBase Solution | Backend Developer

Surat, Gujarat | July 2024 - Present

- Developed and optimized scalable RESTful APIs using Node.js, Express.js, and PostgreSQL/MongoDB, improving system efficiency and performance.
- Collaborated with cross-functional teams to implement agile best practices, ensuring seamless project execution and timely delivery.
- Enhanced authentication and security using JWT and role-based access control, strengthening application security and user data protection.

SKILLS

Programming Languages: C++, JavaScript
Libraries/Frameworks: Node.js, Express.js, Nest.js
Tools / Platforms: Git, VS Code
Databases: SQL, MongoDB

PROJECTS / OPEN-SOURCE

Project-Management-App | Link

Node.js & Express.js, TypeScript, MongoDB, Passport.js.

- A powerful and intuitive project management application designed for seamless team collaboration, efficient task tracking, and organized workspaces.
- Enhanced team collaboration, streamlined project management, and improved productivity with secure authentication and insightful analytics

Social-Media-Micro-Services | Link

Node.js & Express.js, ioredis, express-http-proxy, Helmet

- Implemented ioredis caching, express-http-proxy, express-rate-limit, and Helmet to enhance performance, security, and scalability.
- Improved API performance, scalability, and security while reducing response time and preventing abuse.

E-Commerce-App | Link

Node.js & Express.js, MongoDB, Passport.js, Stripe API, Cloudinary

- Built a scalable Node.js RESTful API with secure authentication, efficient data handling, seamless payment processing via Stripe, and optimized image storage using Cloudinary.
- Enabled secure transactions, efficient product management, and seamless user experience for a scalable e-commerce platform.

Notes-App | Link

React.js with Vite, Node.js, Express.js, MongoDB

- Implemented user authentication, note pinning, search functionality, and a responsive UI for an enhanced user experience.
- Optimized API performance and database queries, ensuring fast and efficient CRUD operations for notes.
